Q1: Do you support the principle that non-residential social care services should be available free at the point of delivery to those who have been assessed by a relevant professional as requiring them (as is the case within health care)?

Yes

Please explain your answer

I am disabled myself and find charges very unfair. I have MS but I didn't ask to have it, I feel I am disadvantaged through no fault of my own.

Q2. Do you agree that legislation is a necessary and appropriate means of addressing the issues identified?

Yes

Please explain the reasons for your response

Legislation will outline every councils responsibility making a more level playing field.

Q3. The current system has resulted in varying charges in different areas for the same level and quality of service. Do you agree that there should be consistency across Scotland?

Q3. The current system has resulted in varying charges in different areas for the same level and quality of service. Do you agree that there should be consistency across Scotland?

Yes

What do you think the advantages and disadvantages would be?

Each council will be following the same set of rules.

Q4. Should all social care related services be free at the point of delivery?

Yes

If you answered Yes, please explain your reasons. If you answered No, please explain which services should be excluded, and why. (Please refer to the services set out on page 7 of the consultation document).

No one should be left financially worse off because they're disabled

Q5. What are the likely financial implications (if any) of the proposed Bill to you or your organisation? What (if any) other significant financial implications are likely to arise?

I would be financially better off. I would be able to live rather than exist.

Q6. What do you think the implications of the proposed Bill are for equality? If it is likely to have a substantial negative implication, how might this be minimised or avoided?

Positive

Please explain your answer. If you answered Negative, please suggest any ways this impact could be minimised or avoided.

Disabled people would be treated on a consistent level

Q7. Are there any other comments you would wish to make that are relevant to this proposal?

No Response
